

It is very important for Air One Radio to be accessible to the many areas it is available. This is the only station that plays the type of music it does. It is very different from all the other stronger heard stations. This music is inspiring rather than discouraging and hurtful. Much of the music found out there is very negative, while Air one send out positive messages. Please do not let this station go away, but rather I wish it's signal was stronger in Los Angeles, People in that area really need "the positive alternative".
